

How to Know When You Need to See a Vascular Specialist

If you answer **YES** to any of the following, it's time to have a conversation with your doctor about your vascular health.

Do you have any of these risk factors?

YES

- Over 50 years of age
- Diabetes
- High blood pressure
- High cholesterol level

NO

- Heart Disease
- Smoking (current or past)
- Family history of heart or vascular disease

Are you experiencing any of the following symptoms?

YES

- Leg pain with walking or at rest
- Slow or non-healing sores on feet
- Swelling, tightness or weakness in legs
- Cold or discolored hands/feet
- Inability to control movement on one side of the body

NO

- Temporary vision loss, blurry vision or floating spots
- Clusters of veins on legs
- Bulging or painful veins on legs
- High blood pressure with decreased kidney function

Have you been diagnosed with any of the following?

YES

- Peripheral Arterial Disease (PAD)
- Carotid Artery Disease (Stroke)
- Aneurysm

NO

- Deep Vein Thrombosis (DVT)
- Venous Insufficiency
- Intestinal and Kidney Artery Disease
